THE IMPORTANT AND MAJOR REMAINING PART OF THE
COLLECTION OF
ANCIENT GOLD ORNAMENTS

from Colombia, South America

formed by the late Senor Ramos=Ruiz,

[SOLD BY ORDER OF HIS TRUSTEE]

The following lots comprise the more important remaining items of this interesting collection, of which part was exhibited at the Colonial Exhibition in London, 1886. Reference was made to the exhibition in the "Times" (in an article which is on view with the objects), in the "Illustrated London News" and other publications at the time, pointing out the extraordinary interest and rarity of the collection. So far as we can trace, no ornaments of the kind have been offered in the open market except a small number in a sale which took place at our Rooms in Wellington Street on 11th December, 1911, when a collection of similar gold objects taken from Lake Guatavita in the Colombian Andes, which was drained on purpose to discover them, were sold.

The collection now offered consists of about 165 items, mostly in gold, but some in copper alloy or other base metal, found in tombs of the aboriginal native tribes, Chibchas, Quimbayas and Caribbeans, which, before the discovery of America and the Spanish Conquest, inhabited what is now the territory of the Republic of Colombia. There are other collections in the National Museum of Colombia and in some of the most important museums of the world, but, by law, no further objects of the kind may be exported from their native land and it is hardly probable that any further collections of such historic, artistic and scientific interest and importance remain in private hands. Considering the peculiar significance and value of this collection, one of the very few available for the study of the primitive inhabitants of the New World, it would be preferable to keep the collection intact.

LOTS 118 TO 131 INCLUSIVE WILL, THEREFORE, BE OFFERED TOGETHER, BUT, IF THE RESERVE IS NOT REACHED, EACH LOT WILL IMMEDIATELY BE OFFERED SEPARATELY AS CATALOGUED.

All objects are in native gold unless specified to the contrary.

IV]; two small Bells, 1 in. and 3 in. long, of oyster shape, the ringers suggesting pearls within, the bases have loops for suspension, found near Penonomé, Panama; a drum-shaped Rattle, the sides $\frac{3}{4}$ in. in diam., surrounded with ropework, the waisted body finely designed with delicate ornamentation [Pl. wears a diadem, the sign of divinity. The figures are sur-
rounded by a rectangular and decorated frame work represent-
ing a bed to which the outlines of the mother's body are
attached by circular and other ornaments and at the head
by volutes, round the frame work and at right angles to it
are fourteen projections from which hang rectangular tablets
[Pl. IV]

** This remarkable and delicate piece of work, perfect except
for a part of the baby's chin which is missing, relates to the
veneration of the Quichas for the child born feet first, and
confirms the existence of a highly developed early civilization.

there are two loops at the back of the body, *Quimbaya*; four
